

Guaranteed
income for life.*
In any market.

Schwab Retirement Income Variable Annuity®
with optional living benefits.

A variable annuity through Charles Schwab, issued by Pacific Life & Annuity Company.

For New York residents only as of 9/29/23.

Insurance products can be issued in New York by Pacific Life & Annuity Company. Product/material availability and features may vary by state.

*The Schwab Retirement Income Variable Annuity offers the ability to generate guaranteed lifetime income at anytime through annuitization, or for those 59 1/2 or older that purchase an optional living benefit, guaranteed withdrawals that can last for life regardless of how the contract's investments perform. Guarantees, including optional benefits, are subject to the financial strength and claims-paying ability of the issuing insurance company, not Schwab, and do not apply to the separate account or the underlying portfolios available with this contract.

Now there's a way to keep your savings invested without risking your income to market volatility.

The Schwab Retirement Income Variable Annuity®.

With the Schwab Retirement Income Variable Annuity and an optional living benefit, you can secure a retirement income stream for as long as you need it—no matter how your investments perform or how long you live.

A retirement product from names you know and trust.

Charles Schwab

You'll have the straightforward guidance of a Schwab investment professional who can help incorporate an annuity into your overall retirement income plan. Plus, your annuity assets will be professionally managed by one of the top money management firms in America: Charles Schwab Investment Management, Inc.

Pacific Life

Your annuity and optional living benefits and standard or optional death benefits are backed by Pacific Life's financial strength and claims-paying ability. For generations, people have relied on Pacific Life to help protect their financial security. Founded in 1868, Pacific Life maintains strong financial strength ratings from major independent rating agencies. These ratings may change and do not apply to the safety or performance of the underlying investment options. For more information and current financial strength ratings, please visit PacificLife.com.

Professional guidance to help you understand it.

When you're considering an annuity offered through Schwab, we encourage you to get involved, ask tough questions, and thoroughly understand the pros and cons. A licensed Schwab investment professional will walk you through the details to help you decide whether an annuity may be right for you.

Here are some important things to keep in mind about variable annuities:

- Variable annuities offer unique benefits and features that have associated costs, but they may be particularly useful in meeting long-term savings and retirement needs.
- Variable annuities have limitations and restrictions.
- Similar to retirement plans such as IRAs and 401(k)s, withdrawals of any earnings taken before age 59½ may be subject to a 10% federal income tax penalty in addition to applicable taxes.
- Unlike retirement plans, annuity assets held outside of qualified accounts are not subject to required minimum distributions (RMDs).
- Withdrawals will reduce your contract value and the death benefit.
- The performance of the underlying investment options is not guaranteed and will fluctuate, and an investor's units, when redeemed, may be worth more or less than the original amount invested.
- The annuity prospectus provides additional details on the annuity fees and charges, including the mortality and expense risk charge, rider fees, and any additional contract fees. **Please read the prospectus and the underlying fund prospectuses carefully before investing.**

Key benefits		Facts to know
Guaranteed income for life	Get guaranteed income for life by purchasing an optional living benefit or by annuitizing your annuity assets.	Optional living benefits are riders, available for an additional cost charged against the Protected Payment Base (PPB) and deducted from the contract value quarterly, which form the basis for income. The PPB is not a contract value and is not available for withdrawal like a cash value. Your actual contract value will decrease with each withdrawal, though you may continue to withdraw your Protected Payment Amount for life even after the contract value has been depleted to zero. Please see the prospectus for additional details.
Growth potential for investments	You can keep your savings invested with the confidence that your income stream is secure in any market when you purchase an optional living benefit.	Optional living benefits are subject to the financial strength and claims-paying ability of Pacific Life & Annuity Company.
Professionally managed investments	Choose from three broadly diversified portfolios, and leave portfolio management to Charles Schwab Investment Management, Inc.	When you invest in a variable annuity, you do not invest directly in the portfolios. You invest in sub-accounts that, in turn, invest in the portfolios you've selected. Your account is then credited with variable accumulation units in that sub-account. The fees and charges for the sub-accounts along with the terms and conditions of your investments are detailed in the prospectus and are in addition to the fees for the variable annuity, the optional living benefits and optional death benefits.
Competitive, transparent pricing	Benefit from variable annuity fees that are competitive with the industry average, and pay no hidden charges or surrender fees.	The base fee of the Schwab Retirement Income Variable Annuity® is 0.60%, as compared to the industry average of 1.29% according to a February 1, 2023, Morningstar survey of 2,373 non-group variable annuities. This does not include fees associated with the optional death benefits, optional living benefits or underlying investment options. As of May 1, 2023, the underlying investment options carry additional fees and expenses of 0.54% to 0.58%. Future Income Generator carries a fee of 1.45% (single life) or 1.55% (joint life). Note: The Future Income Generator rider fee is guaranteed not to change once issued. However, the maximum Future Income Generator fee for newly issued contracts is 2.50% for single life and 2.75% for joint life.
Access to your assets	You continue to have access to your annuity assets for emergencies or unexpected expenses.	Keep in mind that withdrawals will decrease your contract value and death benefit and may also reduce the value of any optional benefits. Variable annuities are suitable for long-term goals, such as retirement, and any withdrawals of earnings may be subject to ordinary income tax and—if taken prior to age 59½—a 10% federal income tax penalty. For nonqualified contracts, an additional 3.8% tax may apply on net investment income.
Optional beneficiary protection	Protect your annuity investment for your beneficiaries with a choice of two optional death benefits, available for an additional charge.	The Return of Purchase Payments Death Benefit provides beneficiaries with the greater of the contract value or the total investments, adjusted for withdrawals. The Stepped-Up Death Benefit provides the highest stepped-up value achieved on any contract anniversary prior to the annuitant's 81st birthday. Cannot be combined with any optional living benefit. Restrictions apply, so please read the prospectus for details.

An annuity can help take the worry out of retirement income. But not all annuities are the same.

Schwab has a straightforward answer for predictable, guaranteed income.

Are one of these right for you?

- You want a simple way to guarantee a portion of your retirement income.
- You want the potential to grow your assets.
- You don't want to give up your assets to get a guarantee.
- You want the freedom to make changes in the future.

Powerful options that provide income for life.

With the Schwab Retirement Income Variable Annuity, you can secure lifetime income through annuitization (included with your contract) or by purchasing an optional living benefit rider, which allows you to stay invested and provide guaranteed lifetime income that is protected in down markets.

The Future Income Generator (FIG) rider is designed to grow your guaranteed income in *all markets*.

- A 5% simple interest credit is added annually to your Protected Payment Base for up to 10 years or until the first withdrawal.²
- Automatic resets can lock in market performance for future income, if greater than the current Protected Payment Base (including the annual credit). After a reset, future annual credits are based on the new protected payment base for the remainder of the 10 years (or until the first withdrawal).
- Starting at age 59½ FIG guarantees an annual income amount equal to a predetermined percentage of the Protected Payment Base for life.^{1,2}

Benefits for heirs.

With the Schwab Retirement Income Variable Annuity's standard death benefit, your beneficiary(ies) will receive any residual value in your annuity. If providing for your beneficiary(ies) is a priority, you can purchase one of two optional death benefits for an additional fee at the time you purchase the annuity. These optional death benefits cannot, however, be combined with optional living benefits. Ask your Schwab investment professional for details.

You can maintain access to your assets.

When you include an optional living benefit with the Schwab Retirement Income Variable Annuity®, there's no need to annuitize and give up access to your assets to get guaranteed income for life. You'll enjoy these benefits:

- You can receive guaranteed income for life.
- There are no surrender charges¹.
- Any residual contract value can be passed on to your beneficiary(ies).

Three professionally managed portfolios.

To provide the broad asset class and sector diversification, Charles Schwab Investment Management, Inc. has created three sophisticated variable insurance trust portfolios.

- Each portfolio, composed primarily of exchange-traded funds (ETFs), offers broad diversification through exposure to domestic and international stocks, bonds, and cash, plus other sectors such as real estate and commodities.
- Choose among three portfolios: balanced, balanced with growth, and growth—according to your risk tolerance and investment objectives.
- You have the flexibility to switch between portfolios, tax-free, if your investment needs change over time.

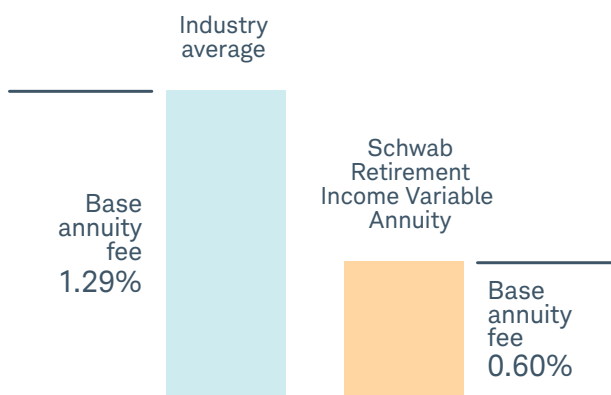

Competitive, easy-to-understand pricing.

With the Schwab Retirement Income Variable Annuity, you'll have the satisfaction of knowing that the base annuity fees you pay fall well below the industry average.

Annuity fees

	Individual Life	Joint Life
Base annuity fee	0.60%	0.60%
Average underlying investment expenses ³	0.56%	0.56%
Future Income Generator (optional) ⁴	1.45%	1.55%
Return of Purchase Payments Death Benefit (optional)	0.20%	0.20%
Stepped-Up Death Benefit (optional)	0.40%	0.40%

Competitive fees keep more money working

Source: **According to a February 1, 2023 Morningstar survey of 2,373 non-group variable annuities, the industry average fee is 1.29%.** This fee does not include the election of an optional Stepped-Up Death Benefit (in the case of the Schwab Retirement Income Variable Annuity), guaranteed lifetime withdrawal benefit, or underlying investment options. The underlying investment options carry an additional fee known as a fund, subaccount, or investment expense/fee.

Choose an optional living benefit rider >

¹ For Future Income Generator rider, withdrawals in excess of the annual protected payment amount or withdrawals prior to age 59½ may significantly and permanently reduce the Protected Payment Base.

² The annual credit percentage and annual withdrawal rates are subject to change at any time. Refer to the latest prospectus supplement at PacificLife.com for current interest credit percentage and withdrawal rate percentages

³ For illustrative purposes only. As of May 1, 2023, the total annual operating expenses for the Schwab VIT Portfolios ranged from 0.54% to 0.58%.

⁴ The annual charge is a percentage of the Protected Payment Base and is deducted quarterly from the contract value. The fee is current as of September 29, 2023 and subject to increase up to a maximum of 2.50% for single life and 2.75% for joint life. However, once issued the rider fee will not change. Please refer to the latest prospectus supplement at PacificLife.com for current charges.

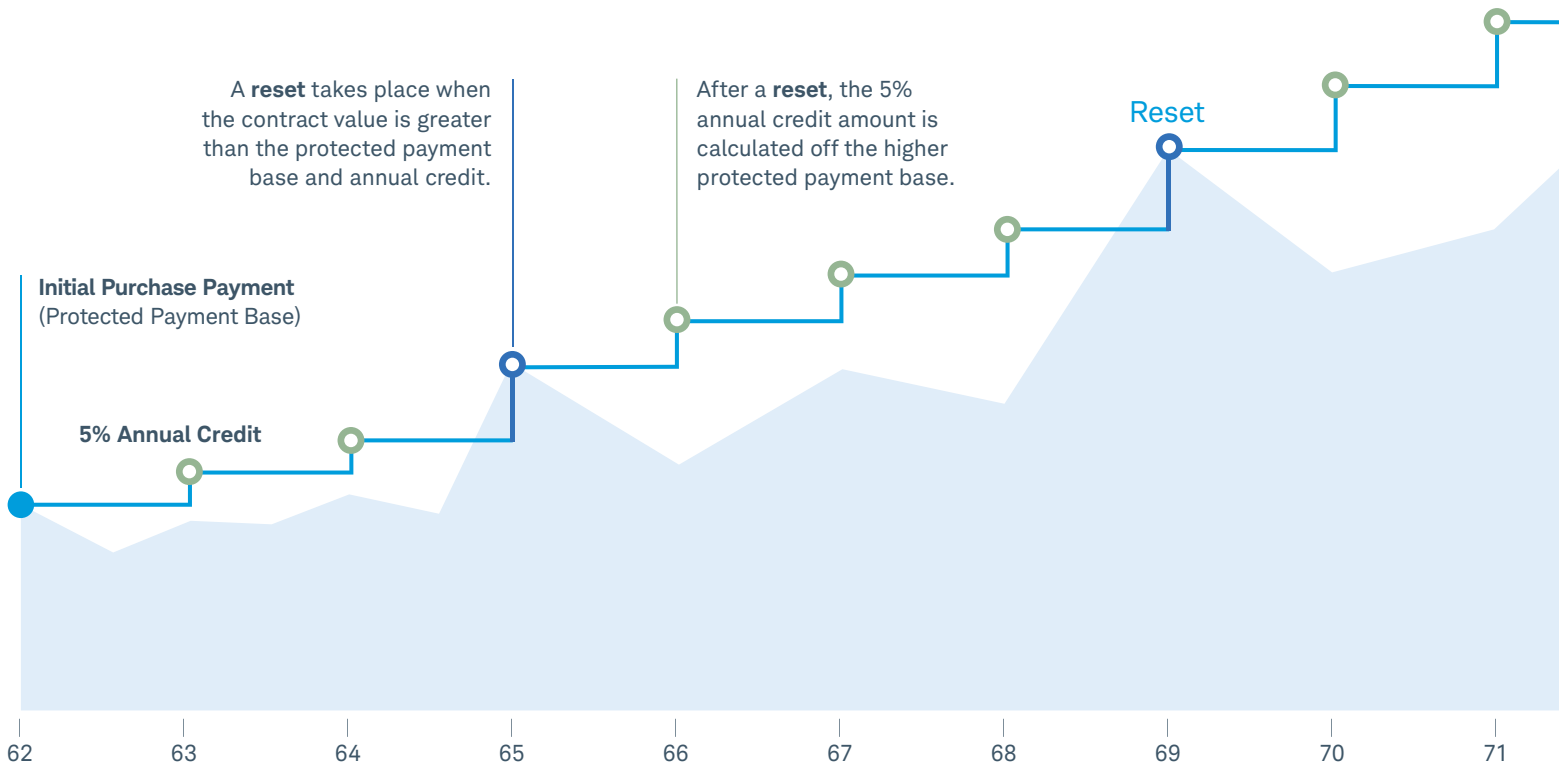

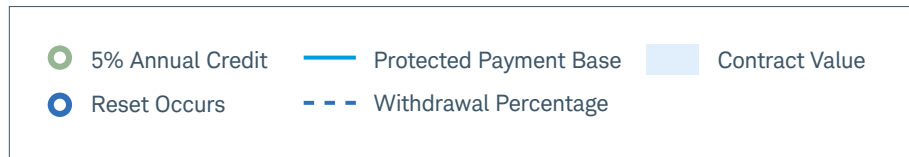

With the Future Income Generator rider your guaranteed income can grow in all markets.

The first 10 years: Guaranteed growth of your retirement income

During the first 10 years, the protected payment base will increase at each contract anniversary by the greater of:

- A 5% simple-interest credit, represented by the green dots in the graph below.
- A reset if the contract value is greater than the protected payment base after a 5% simple-interest credit is applied.

If you take any withdrawals within the first 10 years, the annual credit will discontinue.

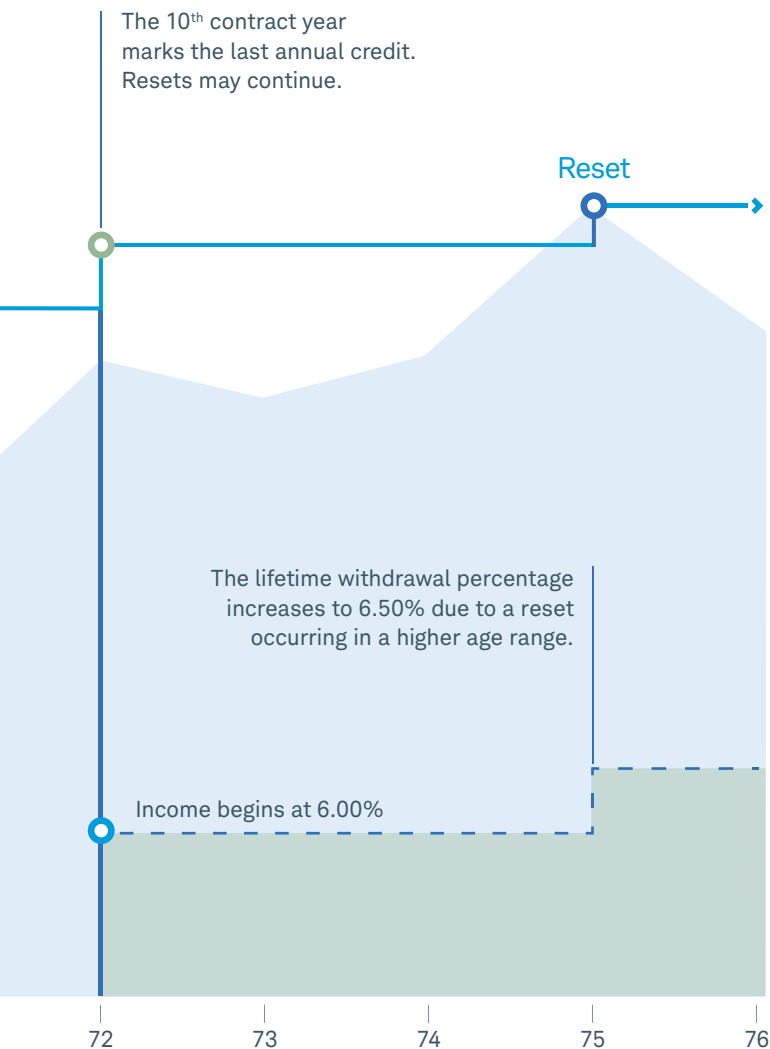

Lifetime Withdrawal Percentages

Please note that the annual credit and lifetime withdrawal percentages for newly issued contracts are subject to change; refer to the latest prospectus supplement at PacifiLife.com for current percentages. The annual credit increases the amount that can be withdrawn in later years, but it is not added to your contract value.

Protected lifetime income

Starting at age 59½, you can begin taking withdrawals up to the lifetime withdrawal percentage. These withdrawals will continue for your lifetime (Single Life) or the lifetimes of both you and your spouse (Joint Life), even if the contract value goes to zero. The lifetime withdrawal percentage is based on the age the first withdrawal is taken or the age the first withdrawal is taken after a reset.

Lifetime Withdrawal Percentage (% of Protected Payment Base)

Age Range	Single Life	Joint Life
59½–64	4.50%	4.00%
65–69	5.60%	5.10%
70–74	6.00%	5.50%
75–79	6.50%	5.95%
80–74	7.10%	6.50%
85–89	7.85%	7.20%
90–94	8.80%	8.10%
95 and older	10.05%	9.25%

Protected Lifetime Income

Income begins at 6.00% because withdrawals began at age 72. The amount you can withdraw will increase, if a reset occurs in higher age range.

6.00%

6.50%

Where could a variable annuity with an optional living benefit fit in your income plan?

Retirement income planning is like a puzzle with many pieces. How those pieces fit together for you—and whether a variable annuity with an optional living benefit is an appropriate addition—will depend on your own personal situation.

Income for essential expenses.

Because a variable annuity with an optional living benefit can provide income that is predictable and guaranteed, you may consider using it to cover the expenses that matter most—essential expenses such as basic health care, food, and housing. With essential expenses covered, you can invest other assets more traditionally in a stock-and-bond portfolio with the objective of providing money for the discretionary nice-to-haves, such as travel and hobbies.

When a variable annuity with an optional living benefit may make the most sense.

- You're within 10 years of retirement.
- You believe you may live at least 20 more years once you begin making income withdrawals.
- You have sufficient savings available for unexpected expenses, reducing the likelihood that you would need to make an unexpected excess withdrawal from your annuity.
- Social Security and other predictable income are not enough to cover essential expenses.

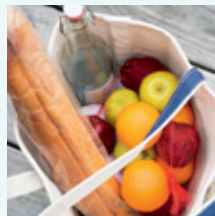

Get the benefit of Schwab expertise.

A Schwab investment professional can help you create your overall retirement income plan and determine whether an annuity may be right for you.

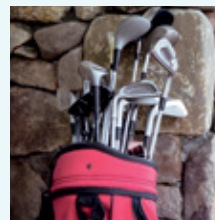

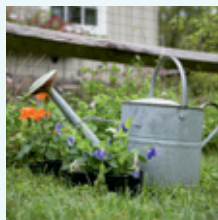

Use guaranteed or predictable income to help cover essential expenses.

Essential expenses

Annuity
Social Security
Pension

Other investment
income

Discretionary expenses

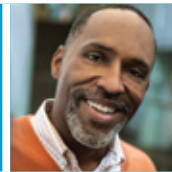

Schwab recommends that you cover essential expenses, such as health care, food, and housing, with income from predictable sources.

Annuities in action: case studies

Here are examples of how the Schwab Retirement Income Variable Annuity® with an optional living benefit may help solve common problems you may face as you approach and start living in retirement.

Sarah M.
Age 58
Plans to retire in eight years

Phil L.
Age 67
Retired (with great genes)

<p>Problem</p>	<p>Sarah needs a stable income source to cover her fixed expenses when she retires in eight years.</p> <p>Market risk can have the greatest impact on a portfolio right before retirement—especially if Sarah wants to remain invested in stocks to help beat inflation. There’s less time to recover from significant portfolio losses, and market rises or falls can have a significant impact on how long savings can last.</p>	<p>Phil is looking forward to a long retirement. His parents are in their late 80s, and longevity runs in the family.</p> <p>Living a long, healthy life can present a challenge when it comes to making income last. Phil will need to find sources of reliable or guaranteed retirement income that lasts for the rest of his life.</p>
<p>Potential strategy</p>	<p>A variable annuity with an optional living benefit protected payment base that can rise, but not fall, helps protect against this risk—especially in the years just prior to and just after starting retirement.</p>	<p>A variable annuity with an optional living benefit can help Phil manage the cost of living a long life in retirement.</p>

Case studies continued...

Steve H.

Age 62

Needs to invest, but is fearful

With limited retirement savings, Steve feels he should stay invested but worries that market declines could reduce his future income.

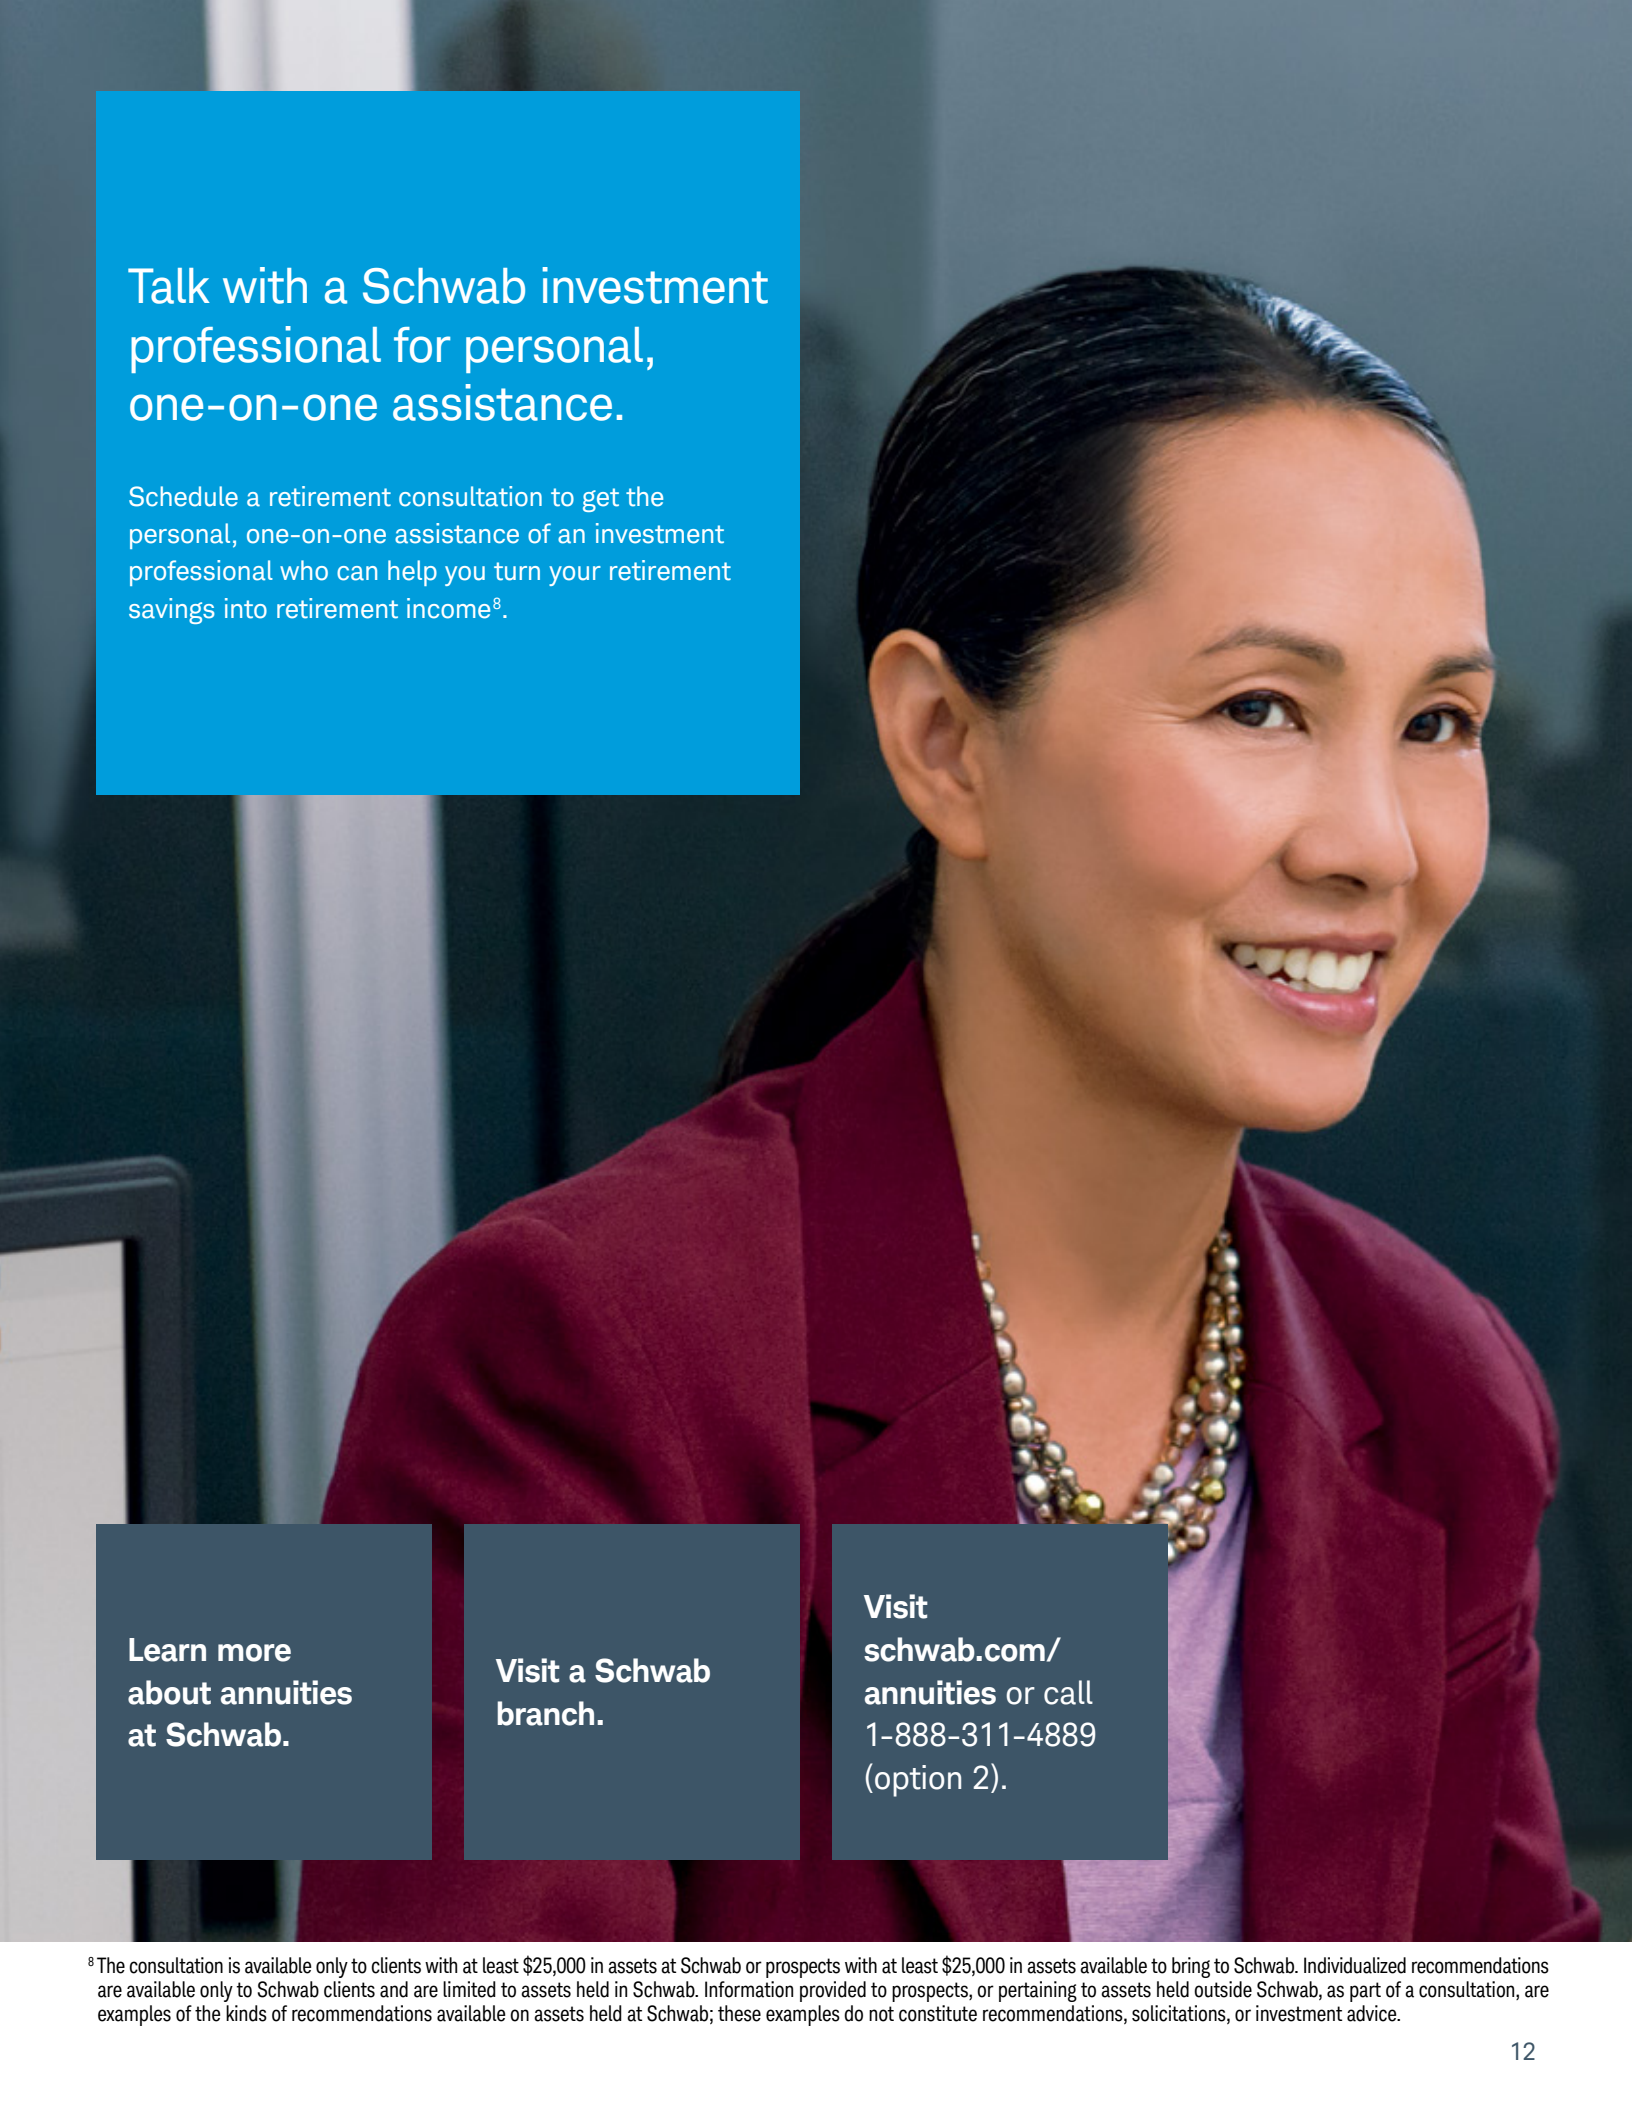

Without some form of income protection, Steve may not invest as consistently or as aggressively as he should. For example, to keep up with inflation and meet income needs throughout retirement, Schwab suggests investors may want to approach retirement with a 60%/40% mix of stocks and bonds, then reduce stock exposure over time.

A variable annuity with an optional living benefit with a protected payment base for future income that can rise, but not fall, may help Steve stick with a more aggressive plan when he might not otherwise.

Confidence to stay invested

Some investors who have guarantees in their income plan may be more likely to stay invested in the market during downturns and less likely to miss out on potential recoveries.

A woman with dark hair pulled back, wearing a maroon blazer and a multi-strand pearl necklace, is smiling and looking towards the right. The background is a blurred office setting.

Brokerage and insurance products: Are not deposits - Are not FDIC-insured - Are not insured by any federal government agency - Are not guaranteed by the bank or any affiliate of the bank - May lose value

Pacific Life is a product provider. It is not a fiduciary and therefore does not give advice or make recommendations regarding insurance or investment products.

Variable annuities are sold by prospectus only. You can request a prospectus by calling 1-888-311-4889 (option 2) or by visiting schwab.com/annuity. Before purchasing a variable annuity, you should carefully read the prospectus and consider the annuity's investment objectives and all risks, charges, and expenses associated with the annuity and its investment options.

Pacific Life, its affiliates, their distributors, and respective representatives do not provide tax, accounting, or legal advice. Any taxpayer should seek advice based on the taxpayer's particular circumstances from an independent tax advisor or attorney.

Variable annuities are long-term investment vehicles designed for retirement purposes. The value of the annuity may be more or less than the premiums paid, and it is possible to lose money.

Annuity withdrawals and other distributions of taxable amounts, including death benefit payouts, will be subject to ordinary income tax. For nonqualified contracts, an additional 3.8% federal tax may apply on net investment income. If withdrawals and other distributions are taken prior to age 59½, an additional 10% federal income tax may apply. Withdrawals will reduce the contract value and the value of the death benefit, and also may reduce the value of any optional benefits.

Charles Schwab & Co., Inc. is a selling broker-dealer and general insurance agency. The contract is sold by Charles Schwab & Co., Inc. ("Schwab") through its representatives and by Schwab's affiliated General Insurance Agencies. Charles Schwab Investment Management, Inc. (CSIM) is the adviser for the underlying investment options. Charles Schwab & Co., Inc. and Charles Schwab Investment Management, Inc. are separate but affiliated companies and subsidiaries of The Charles Schwab Corporation and are not affiliated with Pacific Life & Annuity Company.

All individuals selling this product must be licensed insurance agents and registered representatives.

The Schwab Retirement Income Variable Annuity® is an individual flexible premium deferred variable annuity issued by Pacific Life & Annuity Company.

Future Income Generator is called "Guaranteed Withdrawal Benefit XXII Rider-Single Life" and "Guaranteed Withdrawal Benefit XXII Rider-Joint Life" in the contract's rider.

Pacific Life & Annuity Company is licensed to issue insurance products in New York.

Variable insurance products are distributed by **Pacific Select Distributors, LLC** (member FINRA & SIPC), an affiliate of Pacific Life & Annuity Company.

The home office for Pacific Life & Annuity Company is located in Phoenix, Arizona.

Contract Form Series: 10-2225-13

Rider Series: 20-2427, 20-2428, 20-2302-A, 20-2303-A

State variations to contract form series and rider series may apply.
